

Get to grips with packaging returns

GRIPS™ is the integrated Data Management system that allows you to link your packaging specifications to existing Accounts and Stock Control Systems, enabling you to calculate packaging obligations and produce Compliance Reports in minutes.

More Accurate Reporting

- ✓ Improved data accuracy and verification
- ✓ Cross product reporting
- ✓ Strong audit trail with drill-down capability

Reduced Costs

- ✓ Helps identify high-cost compliance items
- ✓ Less time preparing submissions
- ✓ Reduced training time

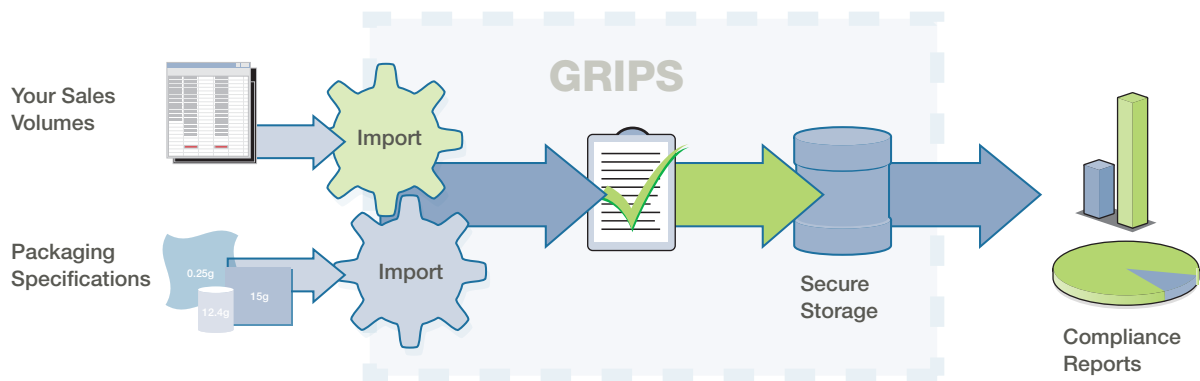

Ease of Use

- ✓ Pre-configured with your business rules
- ✓ User-friendly to simplify submissions process

How GRIPS™ Works

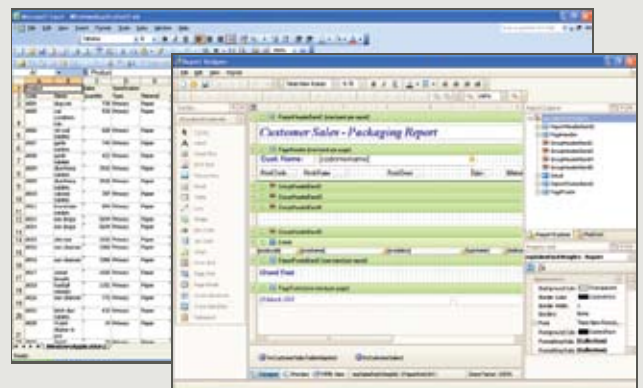

GRIPS™ enables you to manage your producer responsibility obligations by:

- ✓ Linking packaging specs to existing systems
- ✓ Calculating your compliance obligations
- ✓ Extracting the relevant data
- ✓ Producing a complete compliance report

This saves time, reduces errors and removes much of the complexity that surrounds compliance reporting. In addition, the system allows you to drill-down to source data, enhancing inspection capability and maintaining a full audit trail of all transactions.

GRIPS™ Reporting Capability

In addition to producing Compliance Reports, GRIPS™ also allows you to export specification data to MS Excel, enabling you to respond to customer or auditor requests. A built-in Report Designer is also provided to allow you to create custom reports quickly and simply.

Export to MS Excel or use built-in Report Designer
